## Advanced measuring functions for Opticline series with external components

Optional external measuring devices allow for the Opticline optical shaft measuring systems to be extended to additional measuring tasks such as surface roughness measurement. Roughness parameters are integrated directly into the Opticline test plan, simplifying considerably the complex statistical data recording of a workpiece.

### What is required in addition to the Opticline system?

Item	Item no.
Waveline W5 Set or Waveline W10 Set	594 626 (W5) or 1006 5263 (W10)
License for external gauging component	592 392 Tolaris Optic license interface box
Tolaris Optic Update if software version older than 5.65.00	592 387 Tolaris Optic software update
